

Electrical Underwriting Inspection Agencies

Langhorne Borough does not inspect electrical work. Electrical plans submitted in building permit applications are required to be reviewed and approved by an Electrical Underwriting Agency. The Department of Licenses and Inspections requires that a licensed electrical inspector signs off on work related to an Electrical Permit.

For your convenience we have listed underwriters commonly used in the area; however, you are not required to use them.

We do not endorse or recommend any of these Agencies nor do we know what they charge for their inspections. If the agency does not provide a certificate, an invoice or other documentation stating the results of the inspection is acceptable.

Chimney Real Estate Inspection Agencies

Langhorne Borough does not inspect chimneys for Use and Occupancy Certifications. A third-party inspector is required to do the inspection. The chimney inspector's report and/or certificate is needed to complete a Use and Occupancy application. A passing inspection is required to have a Certificate of Use and Occupancy.

For your convenience we have listed underwriters commonly used in the area; however, you are not required to use them.

We do not endorse or recommend any of these Agencies nor do we know what they charge for their inspections. If the agency does not provide a certificate, an invoice or other documentation stating the results of the inspection is acceptable.
